

June 13 ~ June 15, 2023

Masami Okuyama

**<Background>** In response to the request from MIGAS/Indonesia, workshop was held on management techniques, inspection techniques, etc. that would contribute to plant maintenance and reliability maintenance of oil and gas plants by the experts dispatched from Japan.

**<Content>** The following topics have been incorporated to obtain comprehensive information/knowledge related to reliability improvement and maintenance of oil and gas related equipment.

- ① Reliability enhancement program implemented by Japanese refiners (or oil and gas operators)
- ② Reliability enhancement program recommended by Japanese service companies
- ③ Advanced technologies related to inspection and maintenance for oil and gas plants

**<Overview>** It was a rather short program held in Indonesia, there was an active Q&A session, and we believe the MIGAS's evaluation was at a satisfactory level.

**<Venue>** MIGAS's Headquarter, Jakarta, Indonesia

**<Attendants>** MIGAS Group Managers, Officers & Engineers, 59 participants (include 31 online participants)

**<Number of the Experts>** 5 (include 2 online speakers), 2 JCCP
