

# Enhanced Reliability & Maintenance Program for Refining Plants

May 23 ~ May 25, 2023

Masami Okuyama

**<Background>** In response to Qatar Energy (QE)'s request, this workshop was originally scheduled to be held in February 2019 on plant maintenance and reliability management for oil and gas refining plants. After the four years suspension, this event was resumed with the same theme.

**<Content>** Japanese experts were dispatched to Doha, Qatar to give presentations and exchange opinions in a workshop format on management systems and technologies that contribute to equipment maintenance and reliability enhancement for oil and gas refining plants.

**<Overview>** Since refining plants steadily deteriorates year after year, such workshop themes as maintenance and reliability continue to grow in importance. The provision of such training opportunity was evaluated by QE, as very effective.

**<Venue>** QE's Headquarter, Doha, Qatar

**<Attendants>** QE Group's Managers, Officers & Engineers in charge of Plant Reliability, 20 participants (include 4 from QG)

**<Number of the Experts>** 3 Lecturers, 2 JCCP
