BOROUGE  
Joint venture between ADNOC and Borealis

Participated in the Program :  
CPJ-4-17:Capability Development for Women's  
Empowerment in Petroleum Industry  
September 12 - 22, 2017

Mr. Nakai San  
JCCP Management and Team

It's an honor for me to stand here on behalf of ADNOC, Saudi Aramco, ORPIC, Fertil and Borouge team, to thank you for this fantastic opportunity which allowed us to come to Japan and attend this insightful course.

The past two weeks were extremely inspiring for all of us.

Loads of learnings we gained on Japanese culture, women in oil and gas industry and challenges faces as well as strategic topics that relate to us which helps shaping our experiences and putting it into practice.

It was also an opportunity to network and socialize with colleagues in Japan and GCC to exchange experiences and challenges we face.

This was an eye opening for us as helped us identify areas of improvement and practice solutions to close our gaps.

Every day was a unique. Everyday had a different format, different experience and different objective yet it added something new to our experience.

This made us excited every morning we came to the class as we were confident that it will be another fruitful day and will add value to me at personal and professional level.

This proves the time and efforts invested by JCCP to make every day special for us whether it's a site visit, lecture, workshop, exercise, assessment, discussions, field trip and others.

Before I conclude, I would like to thank Ms. Nakayama San and Ms. Onai San for their great support, patience and for looking after us during our stay in Japan. They have looked at all possible details in order to make our trip successful and as smooth as possible. We sincerely appreciate the efforts made by you to make it happen.

We all share the same vision towards empowering women role in oil and gas whether in Japan or in the UAE. And now, each of us is responsible to reflect those learnings into her job and career.

Thank you
