

# **Cambodia's Energy Transition, Sustainable Development Goal 7 and Energy Trilemma**

By H.E. Sok Khavan

Secretary of State

Ministry of Mines and Energy

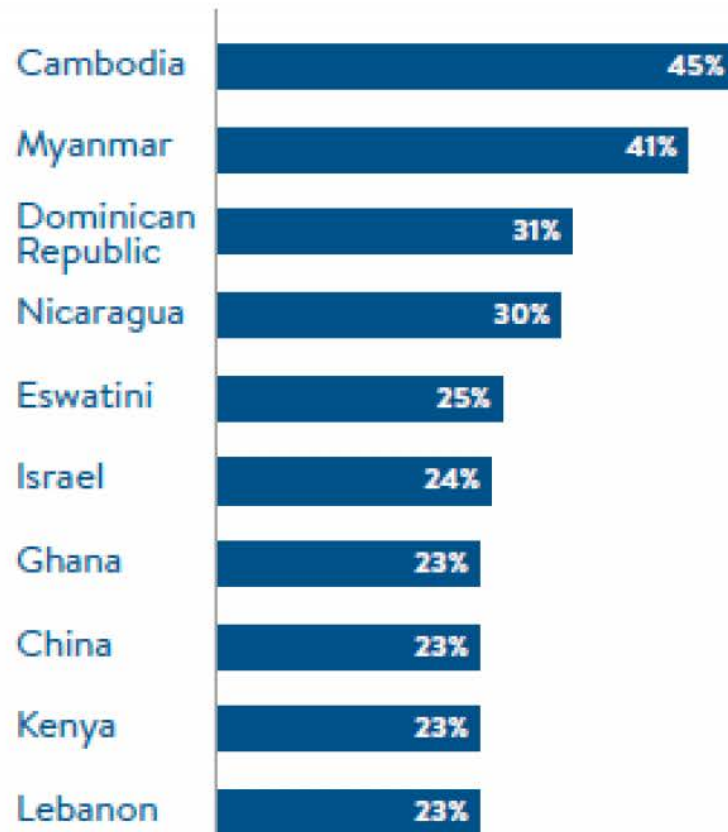

Kingdom of Cambodia

30th January 2020

# Energy Trilemma

## TOP 10 OVERALL INDEX SCORE IMPROVERS 2000 - 2019

- The Index demonstrates the impact of varying policy pathways countries have taken in each of the dimensions over the past 20 years.
- Cambodia Policy
  - Encourage and Promote renewable energy mix such as hydro and solar
  - Improving energy access to rural region
  - Reduce pollutants

# Cambodia

Cambodia

Ranks 105<sup>th</sup> , Trilemma Score 51.6, Balance Grade CDC

- \* Cambodia ranks 105th globally and has shown marked improvement in all three trilemma dimensions.
- \* Energy Security scores have increased due to the drastic improvement in diversity of electricity generation.
- \* In the Equity dimension, access to electricity has almost tripled.
- \* In Sustainability, scores for certain pollutants are improving over time as well as low carbon generation, which has greatly improved.
