

# Total Number of Participants Surpasses 25,000

JCCP has received many participants every year since its establishment in 1981.

And since a total of 25,000 JCCP course participants were achieved in April 2019, the certificate and a souvenir were presented to one who achieved the record.

**Winner: Mr. Hussain Saleh Al Mutahari**  
Vice President, Supply Operations  
ADNOC, U A E

With all participants of JCCP courses IT-1 and TR-2

Mr. Hussain Al Mutahari  
Vice President, Supply Operations  
Crude & Condensate Sales Function  
ADNOC

Participated in the Program :  
IT-1-19: Marketing, Trading and Business Planning  
April 16 - 26, 2019

I had the honor to be a participant 25,000th for JCCP by attending the training course, " Marketing, Trading and Business Planning". The most wonderful thing about this organization was the phenomenon apparent during the training, which gives an impression on the big effort exerted by the organizers.

During the informative training, several facts related to the Japanese market and the most important oil sector were identified as the engine of the economy. It was a valuable opportunity for me and the participants to learn about many important points that have an active role in the Japanese economy such as refineries, refining capacity and Tokyo Stock Market works. At the same time, it was a wonderful opportunity to understand Japanese culture, people and history.

I would like to express my sincere thanks to Mr. Tsuyoshi Nakai, CEO of JCCP, and course coordinators Mr. Masanori Ozaki and Ms. Megumi Suenaga and Ms. Sayuri Abe. I also wish to extend my thanks to all the organizers, lectures and supporters of this program. They worked professionally and efficiently to provide a successful training course from first day until last day. Personally, the meeting and the interaction with the participants had a great role in enriching my information and exchanging experiences, also training period was in the right time where we experienced new big change in Japan history which is abdication of the imperial throne and new era start (Reiwa era)

Finally, I will apply the knowledge that I acquired to my current work and contribute even more in development of my ADNOC group. I will contribute to sustainable growth of my country and to enhancing and promoting the war m relationship between Japan and UAE.
