

IT-2-26 Strategic Management for Petroleum Industry -For Senior Managers

2026.6.2 – 2026.6.12

Course Coordinator : Hiroaki Matsumoto

<Contents>

For senior executives from the governments and state-owned companies of major oil & gas producing countries, this training program provided opportunities to study management, strategy, policy, and advanced technologies of Japan in order to develop the capability to propose new businesses and strategies from a broader and long-term perspective. Participants included vice-president-level executives from national oil companies in UAE, Oman, and Thailand; a general manager of a public-private organization directly under the Prime Minister, as well as a department head manager from the Ministry of Energy and a manager from Aramco, representing Saudi Arabia; a department head and a manager from the Ministry of Oil in Iraq; and a senior executive from Vietnam; and others.
