Course No. CPO- 3 -19

Oct 16, 2019

Course Title: Workshop on “Future of Oil, Gas & New Energy” for Ministry of Energy & Mineral Resources of Indonesia

Course Coordinator Mr. Toshiya Abiko

<Background>

At the request of the Ministry, Japanese 7 experts were dispatched to hold a 1-day workshop on “Future of Oil, Gas & New Energy.”

<Content>

- 1) Energy Outlook of Indonesia: Focus on oil and gas/ ERIA
- 2) Toward the Promotion of Carbon Recycling in Japan (Including CCUS)/ Carbon Recycle Fund
- 3) Sustainable Energy Path & New Energy Development/ Institute for Energy & Innovation
- 4) The future of Oil and Gas Plants with AI/Digital Technology/ Chiyoda Corp.
- 5) Gas Value Chain and its Synergy with Renewable Energy in Indonesia/ INPEX Corp.
- 6) The Integrated coal Gasification Combined Cycle (IGCC) with CO2 Capture Demonstration Project/ Osaki CoolGen
- 7) Overview & Future of Wind Power Business/ COSMO Energy Holdings

<Overview>

It is concluded that the Indonesian participants could fully understand that what an energy mix plan Indonesia should make for the next generation along with recognizing of Indonesian present energy situation, and what technologies Japan is possessing and could supply to Indonesia. In addition, judging from the contents of Q&A, discussion and questionnaire results, this workshop resulted in fruitful international meeting.
