JCCP has supported the establishment of ARRC with participation of Idemitsu since 2006 and continued to work on development of a competent and reliable research centre for 13 years. Based on the accomplishments, ADNOC Refining and JCCP agree to further collaboration and start a new phase with focus on “Optimized Catalysts”, “Kinetics of H₂S corrosion” and “Molecular-Level RFCC Reaction Modeling Using Petroleomics” to stabilize the reliable operation of ADNOC Refining. This project is expected to make a substantial contribution to the management of ADNOC Refining. The project period is scheduled from FY 2019 to FY 2021.
